## COLLEGE OF HAWAII

## OPENS WITH CLASS OF 12

Good Beginning Is Being Made and Good Work Done

THIRTY SPECIALS ALSO RECEIVING INSTRUCTION

New Instructors — New Equipment — Splendid Opportunities for Advanced Education — Names of College's Largest Class.

Owing to the increase in students at the College of Hawaii this year, and also owing to the increase in the number of courses offered considerable additions to the building equipment have been made. During the summer the engineering laboratories have been built. These are comprised in a wooden building 28 feet wide and 75 feet long.

The building affords space for the wood laboratory, for the forge laboratory and the laboratory for testing machines. These laboratories are all fitted up with the best apparatus for the purpose that can be secured and students are afforded an opportunity to get instruction in the properties of wood, iron and steel as good as may be found in any institution in the country. In all of these laboratories the students are given such practice as will enable them to comprehend more thoroughly the principles underlying the physical and structural properties of the materials handled. They also get experience in the handling and use of tools which should be the common knowledge of everyone. The testing laboratory contains one machine with a capacity of 150,000 lbs. for testing the tensile, compression and transverse strengths of wood and steel up to the limit of its capacity. It also has the most recent and perfect recording device for recording not only the amount of power required to break the implement, but also the tensile, compression or elongation properties that it possesses. The laboratory also contains machines and apparatus for cement testing and similar work.

Because of the increased requirements for room, it has been found necessary to add an addition to the chemistry laboratory. Under the present arrangements more than twice as many students can be accommodated in the laboratory than formerly.

In all, more than 24 courses are being given, including all the regular work in the freshman and sophomore years. This being only the second year of the College work, the junior and senior courses as yet have not been provided. The courses at present offered include higher mathematics, advanced english, german and french, chemistry, botany, physics and zoology, mechanical and free-hand drawing, courses in agriculture and horticulture, surveying and painting and practical cooking. Other courses in the regular curriculum will be added as students are prepared to take them.

**Regular Students.**  
This year the regular students numbered 12 whereas last year there were only five. This is not a very large increase in numbers but in percentages it is better than any other institution of like character in the country. The regular students are as follows: L. C. Clark from Oahu, taking the course in Agriculture; F. T. Yong from the High School, taking the course in Engineering; H. K. Ashford from Oahu College, taking the course in Agriculture; Dexter Fraser from Oahu College, taking the course in Science; R. W. Hendry from the High School, taking the course in Engineering; J. M. Kuhns from the High School, taking the course in Agriculture; Valentin Marcellino from the High School, taking the course in Science; W. H. Meinke from the Normal School, taking the course in Agriculture; E. R. Tracy from the High School, taking the course in Engineering; A. R. Tulloch, taking the course in Agriculture; C. Q. Amona, taking the course in Engineering.

**Thirty Specials.**  
There are thirty special students taking from one to three of the various subjects mentioned above. Altogether the College has about as many students as it can reasonably well accommodate with the limited and temporary building facilities it possesses. During the summer members of the faculty have been busy getting together more perfect equipment and illustrative material for the various laboratories so that with these and the important additions to the laboratories in the way of text and reference books, the courses offered this year are much better than before. Four new members have been added to the Faculty in the persons of Professor W. A. Bryan in Zoology and Entomology; Professor Valentin Buehner in Modern European Languages; Professor F. T. Dil-

## AYER'S Sarsaparilla

Is the best family medicine you can have. A thorough course of treatment with it makes good red blood, brings the old color back to the lips, fills out the cheeks, and gives the glow of perfect health.

Perhaps you suffer from the enfeebling effect of a prolonged spell of winter weather. If so, Ayer's Sarsaparilla will vitalize your blood and give you renewed force, vim, and energy.

As now made, Ayer's Sarsaparilla contains no alcohol.

There are many imitation Sarsaparillas.

Be sure you get "AYER'S."

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass., U.S.A.  
AYER'S PILLS, the best family medicine.

## BY AUTHORITY

Resolution.

Honolulu, October 16th, 1909.  
Be it resolved by the Board of Supervisors of the City and County of Honolulu, Territory of Hawaii, that the sum of eight hundred and ninety-two \$8-100 dollars (\$892.50) be and is hereby appropriated out of the general fund for the payment of claim known as Petroleum Rolling Tamping, Engines, etc.

Presented by Supervisor J. C. QUINN.

The foregoing resolution was, at a regular adjourned meeting of the Board of Supervisors of the City and County of Honolulu, held on Saturday, October 16, 1909, ordered passed to print on the following vote of the said Board:

Ayes: Ahia, Aylett, Kane, McClellan, Quinn. Total: 5.

Noes: None.

Absent and not voting: Cox, Logan. Total: 2.

D. KALAUOKALANI, JR.,  
Clerk, City and County of Honolulu.

## Business Notices

NOTICE.

To Whom It May Concern:

Be it known that I, Jacob Bailey, the undersigned, will not be responsible for any debts or obligations contracted in my name by Maria S. Bailey, my wife; and all persons are cautioned against extending any credit to her on my account.

JACOB S. BAILEY.  
Honolulu, October 16, 1909.  
4442—Oct. 16, 20, 25

lingham in Chemistry; and Miss Mildred M. Yoder in English. All of these teachers are specialists in their line and are well fitted both by training and experience to present their respective subjects in the best manner possible.

Within another year the College will be seriously handicapped in its present quarters both for lack of room for the respective laboratories in the engineering courses as well as for opportunities in the field for practical agriculture, horticulture and animal husbandry. By virtue of acts passed by the last Legislature suitable land has been secured in Manoa Valley for all of these practical enterprises. Sufficient funds are not at hand however, for reclaiming the lands for use and for getting them into shape for plantings and
